GENERAL DESCRIPTION

Tetrahedron of 6mm thick Corten sheet and inside reflector inclined on AISI 304* polished stainless steel sheet. The sealed-in lighting system is equipped for metallic halide lamps of 70W or 70W high pressure sodium and it is protected by a galvanised steel grid.

The element is delivered with the MMAMB logotype, except other specifications are made.

WEIGHT 45Kg.

FIX

Anchorage is done using 4 anti-rust treated steel bolts, previously fixed into concrete.

Anchorage bolts and pattern come with the element.

The unit comes totally assembled. Assembly instructions are included with the beacon.

Normal part replacement and maintenance.

Lamp	HM/HPS 70W
Lamp holder	E27
Voltage	230V
