

# Bancal

2000

## GENERAL DESCRIPTION

It is a bent 6mm anti-rust and powder-painted steel plate structure. The seat and backrest are made of solid wood boards of 50/65 x 160mm cross section and variable lengths in tannin-blocked tropical wood or three layered water varnish. For certified woods please ask for prices and delivery times

## FIX

The board fastening screws are in anti-rust steel. It anchors to the ground with two anti-rust treated steel bolts per leg introduced into holes previously filled with epoxy resin, or fast-drying cement or such.

The bench is delivered disassembled. Assembly instructions are provided with the bench.

No functional maintenance is required except to preserve original wood colour.
