

lola

Bench
2004

GENERAL DESCRIPTION

Bench without backrest made of armed concrete, mass coloured. Can be placed freestanding on a surface, attached to the ground or leaning against a wall.

WEIGHTS

Freestanding	127 kg
Attachable	145 kg
Wall	90 kg

CAST STONE PROPERTIES

High quality waterproofed cast stone: HA 30 B20 IIA

Arids: Marble aggregate and selected granulometry. It has CEE and ISO 9001:200 certificates

Water: Potable water without mud neither any other organic component, that could affect the cast stone quality (according to EHE Structural Caststone).

Armed: Electrowelded grooved meshes made of steel B500S (UNE36092)

SURFACE FINISH

Available in mould grey color and white; and visible acid etched black colour.

SECURING

It anchors to the ground with two anti-rust treated steel bolts per leg introduced into holes previously filled with epoxy resin, or fast-drying cement or surch. On soft pavements, it will be fixed 15cm below ground level.

The bench is delivered packed.

Assembly instructions are provided with the bench. Maintenance is not required.
