

Rambla

1993

GENERAL DESCRIPTION

Stainless steel AISI 304* sheet or hot galvanised steel basket, painted on the outside in black. Incorporates hoops to facilitate the subjection of the waste bag.

The structure comprises two 40 x 40 mm L-shaped sections, welded to a stainless steel or hot galvanised steel platen of 16cm in diameter.

CAPACITY:

Wall	25l.
Standing	42l.

WEIGHTS

Wall	9Kg.
Standing	14Kg.

FIX

The wastebasket is fixed into the ground using two blind stainless steel bolts, welded to each platen and introduced into holes previously made and filled with epoxy resin, quick-drying cement or such.

The unit is delivered assembled. Assembly instructions are included with the wastebasket.

Functional maintenance is not required.

*When stainless steel AISI 316 is required, please ask for prices and delivery dates.
