

Raw Color ribbons

Raw Color, 2013

Lampshades

A collaboration around the reflected light of ribbons with Daniera ter Haar and Christoph Brach of the Raw Color studio, who share our curiosity and passion for chromatic tones. These new ribbons, each woven from three special yarns giving rise to three new colours (terracotta, mustard and green) are available for our entire family of ribbon shades, from the small table lamp to the renowned Tripode standard lamp and the giant GT1500 hanging lamp. They are an addition to the three basic colours (cream, red and black) designed in 1994.
