Combining straight sections and semi-circles, Cirio Oval creates oval-shaped compositions of varying dimensions. By connecting linear and curved structures, it allows for large-scale luminaires with a balanced, continuous geometry.

Since ancient times, mosques have used large chandeliers suspended in concentric rings as symbols of unity and transcendence. These floating structures create a sense of weightlessness and harmony within the space. With its enveloping and solemn effect, Cirio offers a reinterpretation of that tradition, aiming to elevate the spirit.

The Cirio family has four shade options. The handcrafted Sargadelos porcelain, whose translucence bathes the white shade in amber, provides a diffuse and very warm light. In its striped version, it also gains texture and three-dimensionality. For greater luminous efficiency, opal glass offers a more intense and economical alternative. Finally, the opacity of brass allows for focused, directional lighting.
