

TRIPODE G5

Luminaire for indoors lighting designed for use with an incandescent lamp with a maximum power of 100W.

UPPER LEG UNIT

The unit consists of three Ø14mm tubes arranged as a tripod. The centre of each tube is welded to a ring and the top to a disc that acts as a support for the decorative cover and secures the lampholders. The whole unit, including the cover, is manufactured from iron finished in textured black satin paint.

LOWER LEGS

Three independent legs made from textured black satin painted Ø14mm iron tubes, connected to the three upper legs by means of polished brass joint elements. Each of the legs has a black PVC tip at its base and one of them is drilled for wire entry.

TG5 SHADE

The shade consists of black painted Ø4mm iron rods, covered with 36 mm wide cotton tape in three colour options: natural, red and black. The structure is attached to the lampholder by means of its central ring.

CONNECTION AND ADJUSTMENT

The luminaire incorporates a connection system made up of a black VLM 1052 plug with round, black 2x0.75mm² cross-section wire and a black RELCO 5000 type controller.
