

MOARÉ

Table, Floor, Hanging and Wall Lamp

2003

GENERAL DESCRIPTION:

The MOARÉ lamp, originally designed in 2003, is based on the fact that its superimposed shades cause an optical effect of asymmetric waters, known as the Moiré effect. Since then new formats, supports, colours and sizes have been added, so the current SERIE MOARÉ deploys numerous combinations to satisfy very different applications: from large public spaces to the more domestic uses. In 2008 a black shade was added which creates a similar effect to that of the grey shade but more contrasted, highlighting even more the lights and the shadows by which the true night owl loves to be surrounded.
